A calendar grid for September and October 2023. The grid features vertical columns for each day, with shaded vertical bands for weekends (Sundays and Saturdays). A horizontal line separates the month headers from the grid. Below the month headers, the dates 1 through 31 are listed for each day, with corresponding day abbreviations (FRI, SAT, SUN, MON, TUE, WED, THU) in small text below the numbers. The grid itself consists of a top row with the dates and a series of horizontal lines below, creating a grid structure. The dates are arranged in two rows: the first row contains days 1-30, and the second row contains days 1-31.

The grid is designed for weekly planning. It consists of 31 vertical columns, each representing a day of the month. The first two columns are shaded light gray and represent the weekend (Sunday and Monday). The remaining 29 columns are white and represent the weekdays. Each column is divided into 24 horizontal time slots by dashed lines, providing a structured area for entering activities or appointments. The top row of the grid contains the date numbers, and the second row contains the day of the week abbreviations.
